Many will now be amazed at the headline: How, from the German island? I mean Germany, of course, but if I hear the news, speeches and actions by German politicians like Spahn, Merkel and Co., but also virologists and other experts, and I had no internet, then I would have to come to the conclusion that the Germans, so we, live on an island of bliss, at least as far as Corona is concerned. Because everything is great here in Germany, more and more bans are being withdrawn and visitors are allowed back in. And this despite all the prospects and numbers that break new negative records every day and are long approaching the numbers that led to the lockdown in mid-March. Only two things do not fit into the pretended ideal German world: The ominous wearing of masks is not reduced, no, now masks should even be worn in certain open areas, but not in closed rooms. You don't believe that: But yes, I'll give you a couple of really crazy examples here that contradict common sense: Council meeting in the Lokhalle Göttingen this Friday: property next to approx. 30 council members, around 15 visitors, security and help, so around 60 People. The locomotive hall holds around 7500 people without seats and is ventilated accordingly.

And now the rule on the day of the council meeting: if you move around in the hall, you must wear a mask. If you are seated, you can remove the mask. The same stupid rule for an event in a free parking lot of a retail store: Approx. 500 spectators crouching on benches without any distance. Here, too, the following applies: Do not sit with a mask, wear a mask while standing. But it gets even better: The Deutsche Bahn: Go into the station hall, sit or stand, mask compulsory, even on the platform. And of course keep your distance, 2m are the order of the day. Even on the platforms. But if you get on the train and sit in the compartment, you are suddenly allowed to sit at a distance of centimeters with strangers in spite of non-compliance with the minimum distance and poor ventilation when the compartment is fully occupied. I could continue these stupid examples at will, to that extent I can now understand citizens who completely refrain from wearing masks. Of course, the risk of infection is greater then, but the rules are stupid and arbitrary, that doesn't work at all.

Meanwhile, the number of new infections is increasing massively within the EU, Spain, France, Italy, the Czech Republic, everywhere the numbers are now increasing almost as steeply as at corona weddings, France has already exceeded its values. In Germany, too, there are now over 2000 new infections per day, if interested? Nobody. Spain sometimes has more than 10,000 new infections per day, the Czech Republic more than 1000 per day, which is more than 10% per day with a current total of just over 10,000. We still remember the celebrations on the street and in bars and pubs that we survived Corona. Gone stupid. Even the clever sayings that alcohol is the cure for Corona probably didn't work.

The fact that Corona is no longer taken seriously here in Germany, regardless of what is reported, also makes this news clear: There are 7500 or even 10,000 visitors in the stadium for 2 Bundesliga soccer games. Supposedly great hygiene concept, also raves about Prime Minister Schwesig and Rostock's sports director. There is talk of great joy for the fans and a huge opportunity for football. Unfortunately, the fans didn't know, because they were standing tightly packed as usual and wearing masks, what's that supposed to mean? And the 450 or so people who handled pyrotechnics, smoke pots and rockets? It now says: It is being investigated for violating the Explosives Act and breach of the

peace. Eat clear, the show has to go on, so must the smart talk. You can also see it at the game FC Bayern Munich against Schalke 04. In the Allianz Arena, FC Bayern bosses sit close together, mask and distance nil. The same picture with the guests. And Rummenigge: Misunderstanding when interpreting the Corona requirements. He probably wanted to say: Interpretation and compliance with the corona rules according to FC Bayern Munich regulations.

And because we live here on the island of bliss, hospitals have also begun to dismantle corona beds and / or occupy them otherwise. No problem, they say, in the event of a revival, the beds can be reactivated quickly. Eat great.

What doesn't work on football pitches, with things like contact forms and so on, is supposed to provide additional security in pubs, restaurants and the like. Should or do it? Both not. On the one hand, massive violations of data protection, which are of no interest to anyone because they are not turned off, on the other hand, the majority of the guests do not take the lists seriously anyway. And the entries are not checked anyway, not even in court. This is what happened the other day in Hamburg, more precisely in the cat bar. Six employees are tested positive and the contact list is processed, but: Hundreds of entries are wrong, wrong names wrong phone numbers. So everything for the cat.

However, anyone who thinks that they have to publicly deny their coronavirus in terms of mask and distance may be brought back to the ground very quickly. Who z. B. works in an occupation that has to do with corona patients and is caught on a Coronademo without protection, the employer may terminate the contract without notice. There are also labor law problems if you report sick a few days after a demo visit due to corona signs. There are now some labor law assessments and effects of those who consciously defend themselves against protective measures or even propagate them in public or on the Internet.

A lot of trouble threatens our ever popular Minister of Health Spahn. In the manner of Scheuer, he had accepted all offers for mask delivery at the corona weddings at that time, but not all of them, let alone paid for, after the supplies were flooded. For various reasons that are characterized by deficiencies, according to the ministry. The suppliers see it very differently and a large wave of lawsuits and damages is now rolling towards the Ministry of Health, no, correctly said, towards the taxpayers, because they, you and me, are the stupid ones who have to pay for the mess. And that's not all. First the ministry says that you do not pay because of alleged defects, then hundreds of millions of masks should be near the expiry, so you have to give them away abroad. One, no, so far 5 !!! Inquiries in the ministry altogether from me and I was still not told when the ominous masks expire and why scrap goods are given away abroad, which is obviously not good enough for the domestic market.

I had placed an order for masks and ventilators that was simply ignored. When asked, no reference to my order, why it was not carried out, but: The quotas are allegedly forwarded to the federal states and, if desired, to the statutory health insurance associations, which then distribute them as required. I don't think so and there is no reference to the expiring masks, it is clearly simply covered up, called democracy or something. I'm not revealing anything yet, but have started an action that will expose the machinations. More on that in a few days.

Our experts have now reached new heights and a new remedy for the pandemic was born. It's so simple and classic that no one has had the idea of using it before, it borders on a miracle: the mouthwash. Allegedly, gargling with mouthwashes is supposed to reliably kill viruses, bacteria and fungi in the mouth / throat area if the application is held for about 30 seconds. This should also apply to corona viruses. What surprises me: After more than 6 months, someone suddenly comes up with the idea of using mouthwashes against Corona. Experienced virologists didn't know that? Have sponsorship contracts been concluded here with manufacturing companies who also want to get their share of the earnings pie? Sorry, I can't believe it, nobody knows that beforehand and suddenly it pops

up from a drawer, supposedly there is even a study that proves it. What a wonder, the study listed 3 mouthwashes as being particularly effective by name and ingredients. And then there is the note that the products are all available in pharmacies without a prescription. Eat clearly, but in terms of thoroughness I would have had a recommendation which pharmacies are particularly suitable.

Again it reads like sunshine on the horizon: It's about a vaccine against Corona, the reports no longer leave, Spahn should already be in the process of creating a list that determines the order of the population groups that are to be vaccinated first and later . There is still a vaccine and there is none to be distributed: The Russian one is a flop, other companies have stopped testing because of serious complications to test persons, nothing can be distributed yet.

And finally I have to talk briefly about a woman I can't talk about as I would like, but I can say that she is the very last one for me. Why ? This US citizen, just 26 years old and infected with corona, goes to a hotel and various bars just to have fun. The fun, however, has serious consequences: So far, over 23 people have been discovered to be infected by her, due to the tingling, not all contacts could and cannot be traced, and far more sick people will certainly have been produced. And the hotel may also thank you. It has been temporarily closed.
